Hi Ivan

thank you for sending these. Having this draft annual report will help me get started on your annual review letter so we can have that before working on the grant application (I probably will not have comments on the report). EPA's FY13 budget operating plan not quite done yet. I understand we should have the FY13 state 319 allocation chart from HQ soon. I'd heard the national 319 budget may be cut 5.3% from last year's 2012 levels, and so then the state allocations. So will have to wait and see but that is what I have heard so far-

very best to you

Rick

Subject: DRAFT 2012 NPS annual update and 2013 319 recommended work plans

Rick, greetings.

I hope you are doing well.

Since our last conversation I mentioned that I would send you a working draft for the 2012 NPS annual report. I am enclosing such draft. We are close to finalize it but if you have time to go through it and have comments, we welcome them.

I am also attaching to this message a list of the proposed work-plans for 2013. As you may remember, for the 2013 RFP we ran the request of proposals in two phases, the first one, asking for "concept" papers, to screen the project proposals, and the second to work with those applicants whose work-plan was identified as high priority and develop a final application. The attached list a result of this process.

I am sending separately a CD with the full applications of the recommended work-plans, and for your reference all the applications received.

Please let me know if I could provided additional information.

By the way, I assume that EPA has a budget, could you update me?

Best wishes
